

MENTAL HEALTH COURT

Yavapai County Mental Health Court utilizes a team approach to address the needs of clients with mental health disorders. The team regularly collaborates to connect participants with available services in the community. Our comprehensive approach includes coordination with outside agencies to ensure participation in treatment, medication monitoring, housing programs, crisis intervention, peer support, and case management. Adjustments to the level of supervision are predicated on each participant's individual needs and response to treatment. Mental Health Court aims to improve probation compliance through increased contact with a Superior Court Judge and utilization of incentives and sanctions to address behavior with a therapeutic approach.
